FEATURE ICON KEY

Features may be added after publication of the Release Preview document. Additionally, in some cases, a feature may be included with a specific Product group for the Release Preview, but moved to another Product group for the full Product Release Notes. If there is a noteworthy change to a feature, the release note will be marked with one of the following icons:

New!	Indicates that the feature release note was added since the initial version of the release notes was published with the push to the test environment.
Updated!	Indicates that the feature release note has had a major update since the initial version of the release notes was published with the push to the test environment.
Moved!	Indicates that the feature release note has been moved to a different document since the initial version of the release notes was published with the push to the test environment.

SAVINGS MANAGEMENT+ ENHANCEMENTS

New Chart Library for Saving Initiatives

The **Charts** page contains graphic representation of the savings that are planned and being attained by a saving initiative. Charts are available to illustrate saving accumulation over time, the saving record totals for each record period, and the savings detailed by saving category. Each of the charts differentiates between the values to be agreed, agreed values, and the actual values.

In 20.1, the chart library has been replaced with a new library for improved appearance and usability. For users' convenience, the underlying functionality of the charts remains unchanged
