

BROWSER SUPPORT FOR SCIQUEST PRODUCTS

June 2015

sciQuest[®]

WELCOME!

Our Policy

SciQuest is committed to providing industry-leading products and services. We strongly encourage customers to upgrade regularly to the newer versions or consider a dual browser strategy, in accordance with your company policy.

To deliver the best product experience, we need to periodically announce end of support information. SciQuest typically provides its customers three or more months notice when a browser is no longer recommended.

This document provides a list of **Supported Browsers** for the following SciQuest Products:

ADDITIONAL INFORMATION

- In most cases, SciQuest stops support due to browser age (>3 years) or if the browser is no longer supported by the manufacturer. Older browsers typically deliver a sub-optimal experience with our software.
- Alpha, Beta, or unreleased versions of browsers are not supported by SciQuest.
- The supported browsers only apply to the SciQuest SaaS solutions and are not applicable for deployed or customized solutions (with exceptions noted for Contract Director).
- SciQuest SaaS products are browser-based, hosted applications that do not have inherent minimum operating system (OS) specifications, therefore this document does not contain any OS recommendations.
- Any browsers not listed have not been validated by SciQuest and are not supported. Issues arising from use of these browsers will not be addressed by SciQuest.

SELECTSITE PLATFORM

Browser Support for Spend Director, Requisition Manager, Order Manager, Supplies Manager, Accounts Payable Director, AP Express, Total Supplier Manager, Sourcing Director and SciQuest Supplier Network

Platform	Supported Browsers
Windows	Internet Explorer (IE) 8*, 9*, 10, 11 Chrome – latest version – automatically updated by Google Firefox – latest version – automatically updated by Mozilla Opera 10 and higher
Macintosh	Safari 4.0 and higher Firefox – latest version – automatically updated by Mozilla
iPad	Safari – embedded browser within the iPad

DETAILS:

- Firefox 3.6 and IE 7 are not supported.
- Internet Explorer versions 8 and 9 are not supported with new attachment functionality starting with the 14.3 release (drag and drop for attachments and adding multiple attachments)
- Email approvals are designed to work with embedded browsers for Android, Blackberry, and iPhone/iPad mobile devices. Readability of emails vary based on email client and formatting selected.
- iPad is supported by SciQuest, however not all Supplier punch-out sites will support use of this device.
- Although Safari is supported by SciQuest, not all Supplier punch-out sites support this browser.

SELECTSITE IPAD CONFIGURATIONS

For the optimal experience when using SelectSite on an iPad, we recommend that you configure the following settings:

Setting	How to update
Pop up Blocker: “Disabled”	Settings -> Safari -> General: Block Pop-ups
Open New Tabs in Background: “Disabled”	Settings -> Safari -> General: Open New Tabs in Background
Block Cookies: “Allow from Websites I Visit” or “Always Allow”	Settings -> Safari -> Privacy and Security: Block Cookies
Javascript: “Enabled”	Settings -> Safari -> Advanced -> Javascript

DETAILS:

- By default, the Pop Up Blocker setting is Enabled, and Open New Tabs in Background is enabled. Both of these must be updated manually. Other recommended settings are Apple default settings and do not have to be changed unless they were updated previously.
- The location to update settings may vary slightly as Apple updates the operating system.
- iPad is supported by SciQuest, however not all Supplier punch-out sites will support use of this device.
